

KSHITIJA NIKALE

Student of Computer Science & Design

@ kshitijanikale4@gmail.com <https://shorturl.at/ueLBW> <https://github.com/KshitijaNikale>

SUMMARY

I am a fast-learning student of Computer Science & Design with hands-on experience in text analysis, visualization, and excel dashboards. I specialize in transforming raw data into actionable insights and interactive dashboards, demonstrating a strong foundation in programming and machine learning techniques

EDUCATION

Bachelor of Technology in Computer Science & Design
Met BKC college

09/2022 - 05/2026

SKILLS

NLP	Gmail	Python	Pandas	MatplotLib	NLTK	GitHub	SQL	EDA	Streamlit	Numpy
Regex	Scikit-Learn	Seaborn	Jupyter Notebook	Visual Studio Code	Pivot Table	Power Query				

PROJECTS

Red Flag Detector - NLP Dating Bio Analysis

Red Flag Detector - NLP Dating Bio Analysis

- Classified dating bios (green, red, mixed flags)
- Visualized trends by app, region, and age
- Tools: Python, Pandas, Matplotlib, NLTK

Netflix Binge Analysis - SQL Data Project

Netflix Binge Analysis - SQL Data Project

- Designed database schema and created 3 linked tables (users, titles, watch_history)
- Wrote analytical SQL queries: most binged shows, top genres, total watch hours, user behaviour patterns

Mental Health Project (NLP + ML)

Mental Health Project (NLP + ML)

- Build end-to-end ML pipeline: Data cleaning, text preprocessing, EDA, TF-IDF, and logistic regression
- Evaluated model using confusion matrix, precision/recall
- Produced clean visualizations and insights for classification performance

Mental Health Classifier - Streamlit Web App

Mental Health Classifier - Streamlit Web App

- Developed an interactive text-based Streamlit app with real-time prediction
- Integrated cleaned ML model outputs into a simple UI for user testing
- Deployed using Github + Streamlit Cloud for accessibility

Budget vs Burnout - Excel Dashboard

Budget vs Burnout - Excel Dashboard

- Created an Excel Dashboard using Pivot Tables and Power Query

EXPERIENCE

Data Analyst - Independent Project

Self-Employed

06/2025

- Analyzed real-world datasets using Python, SQL, and Excel to extract actionable insights
- Built interactive Power BI dashboards for trend and KPI analysis
- Performed data cleaning, tranformation, and validation using Pandas
- Applied statistical analysis to identify patterns and anomalies
